PROFESSIONAL SUMMARY

I am a college graduate with web design and small tech industry experience. I can work from home or an office and efficiently communicate with others to make sure that a job is handled. I have worked in both support and design for website development, which taught me the consumer/creator relationship and how to appropriately communicate with customers.

TECHNICAL EXPERIENCE

- **Languages:** PHP, HTML, C++, Python, Java, SQL, R, JQuery, C#
- **Web Development & DevOps:** Front-End/Back-End Development, Server/Domain Management, WP Engine, Hostinger, .NET focused web development
- **Tools & Platforms:** Unity, Game Maker Studios, Musescore, Notepad++, WinSCP

JOB EXPERIENCE

PLEXAMEDIA, GADSDEN, AL

05/2023–Present

Support Manager

- WP Engine/Hostinger management for creating and managing client sites.
- Support Staff Lead, answering tickets and calls from clients every day. Delegating where needed.
- Social Media Manager, scheduling content for our site and for the social media accounts of a dozen other clients monthly.
- Website Development, working on building websites from client notes and meetings during the development phase.
- SFTP Management, handling plugin management, updating, and rewriting in-house custom plugins for new sites.
- Analytics Management, handling Google Analytics to clients and reviewing how to better improve their SEO score.
- SEO Specialist, running audits and then going through and taking apart the site to improve the site score.
- Domain Management, helping clients track down their domain accounts, and making changes to their DNS. Ranging from setting their domain towards our hosts or helping them with various records-based issues.
- Plugin development, creating plugin-based solutions to certain clients' needs or altering plugins found online to fit specific situations.
